SKILLS

Core

Angular (14 ... 22), TypeScript,
RxJS, NgRx, Angular Signals,
HTML/SCSS, BEM

Architecture

Nx monorepo, micro-frontends
(single-spa), i18n /
multilingual, zoneless,
standalone, OnPush, design
systems, clean architecture

Platforms

Web SSR (@angular/ssr),
Smart TV (Tizen / webOS),
Mobile (Ionic), Desktop (Tauri)

CI/CD & Infra

GitLab CI/CD, Docker (multi-
stage), Nginx, Kubernetes /
Kustomize, feature flags

Testing

Jest, Vitest, TestBed, custom
auto-spy, 90% coverage gates

Other

Node.js, REST, WebSocket,
SQLite, Rust (AI-assisted),
Bun, ESLint / Prettier / Stylelint

LANGUAGES

Russian

Native

English

Professional working

SUMMARY

Tech Lead / Senior Frontend Developer with **14+ years** of experience. Angular is my core strength — shipped across **every platform**: web (SSR), Smart TV (Tizen/webOS), mobile (Ionic, iOS/Android) and desktop (Tauri). I architect large Angular apps end-to-end — Nx monorepos, micro-frontends, multilingual (i18n), zoneless, signals, NgRx, design systems — and build **GitLab CI/CD from scratch**. Testing-first: raised a project to **90%+ unit-test coverage**. Driving AI-assisted development with custom Claude Code skills, agents and hooks. Lead frontend teams.

EXPERIENCE

Senior Angular Developer

2023 — Present

Remote

- Building and architecting **large-scale Angular applications** — modern reactive architecture (NgRx, Signals, zoneless, OnPush), design system and shared libraries.
- Strong **testing culture and CI/CD** — coverage gates, performance budgets and code-quality checks.
- Driving **AI-assisted development** to speed up delivery and code review.

Tech Lead / Senior Frontend

2019 — 2023

The 5th Kind · US, Remote

- Distributed digital-asset management platform. Led migration to a **layered NgRx architecture**.
- Custom **virtual scroll** for dynamic-height items; complex forms via FormControlValueAccessor; OnPush + immutability performance overhaul.
- Ran **20+ technical interviews**; hired and mentored newcomers; helped build the code-review process.

Senior Angular Developer

2018 — 2019

Arcadia Inc. · Taganrog

- Designed the product's UI architecture, planned refactoring, shipped **10+ major features**; mobile iOS/Android with Ionic.

Senior Full Stack Developer

2015 — 2018

Umbrella IT · Taganrog

- Full-stack (Angular + Node.js) for international US/EU clients via Upwork. **Top Rated, 100% job success**.

Frontend Web Developer

2012 — 2015

TutMee Agency · Taganrog

- Built **50+ landing pages** and online stores; focus on responsive layout and performance.

PERSONAL PROJECTS / OPEN SOURCE

Litely — cross-platform desktop app (Tauri + Angular 22, Rust) for batch image/video/PDF compression. Browser extension pastes compressed files into Jira/GitLab. · asdalexey.github.io/litely

Bonds Tracker — personal bonds tracker (Angular 22 + Tauri 2 + Rust, SQLite, real-time WebSocket); smart portfolio, audit, screener, coupon calendar, Tinkoff/MOEX/CBR APIs, Plotly, Telegram bot.

vitest-auto-spy — open-source typed auto-mocking for Vitest (the missing jest-auto-spies); zero dependencies. · github.com/ASDAlexey/vitest-auto-spy

Claude Code config & skills — custom skills, agents and hooks; AI code-review for large Angular MRs.
