Summary: Senior Angular Developer - 11 years

11 years of experience as a JavaScript developer with various frameworks, of which I have been writing on Angular framework for more than 9 years. My mission is to create an amazing app and bring unique designs into reality. I work well in a team and I love to do refactoring. Specializes in Angular, Frontend architecture, configuring and supporting all frontend configs, linters/prettier, review code, development of core components and services, mentoring.

Technical skills:

- Frontend:
 - Angular(2+) - current project on Angular 15
 - Ionic Angular
 - NGRX / RxJS
 - i18n(@ngx-translate and standard angular 18n with xliiff)
 - Server-side rendering(SSR) with Angular Universal
 - WebSockets
 - Typescript, ES2015+
 - Canvas / Svg
 - Webpack
 - ESLint / TSLint / Prettier / SonarLint
 - Sass / PostCss / Stylus / Less / CSS / Responsive Design
 - HTML / JADE / EJS / HAML
 - Ionic - hybrid mobile app Framework
 - React.js / Redux
 - Code review / Mentoring / Performance optimization
 - Figma
- Backend:
 - Node.js (Express.js + Typescript / ES2015+), Puppeteer, Swagger
 - Nginx / i18n
 - Mysql/ PostgreSQL /Redis / Elastic search / Dynamo DB
 - Crawlers: PhantomJS / CasperJS / Prerender.io
 - ESLint / TSLint
 - Code review
- DevOps: Docker / Docker Compose
- Team work: Bitbucket, Gitlab, Jira, Trello, GitHub

Education:

- Higher educational: Taganrog State Pedagogical Institute named after A.P. Chekhov Studied from 2004 to 2009
- Faculty and specialty: Faculty of Physics and mathematics, specialty teacher of mathematics with additional specialty teacher of physics.

- Average mark: 4.97 out of 5

Experience:

5th Kind Inc - February 12, 2022 – till now

- Position: Senior Angular Developer
- Technologies: Angular, RxJS, Angular Material, ES2022, Typescript, NGRX, Responsive layout, WebSocket, Ag-grid
- Responsibilities: Development of frontend parts of a media secure platform for collaborative assets management, creating new functionality. Frontend architecture, i18n, Review code, Creating Single Page Applications. I worked on optimizing the performance of the application, in particular, there was a case of multiple selection of list items in tiled and tabular forms, which worked extremely slowly for about 180-200ms, selecting one element and setting the checkbox to zero, as a result, it turned out to be found from the spot strongly leading to a performance drawdown and speed up the work on selecting files almost 200 times, the elements began to stand out ha 0.4-0.5ms.
- What interesting things I've implemented into the project:
 - transfer of the project from a service architecture to a modern well-structured NGRX(Reactive State for Angular) architecture with a qualitative division of business logic into layers
 - actively participated in the development of the code review system in the project.
 - extensive experience with RxJS, with the ability to move business logic in ngrx effects
- Private projects for Marvel, Walt Disney, Warner Bros., Epic Games, Universals: <https://www.sohonet.com/>

JSC Arcadia Inc - May 14, 2018 – February 12, 2022 (3 years 8 months)

- Position: Senior Angular Developer / Tech Lead
- Technologies: Angular, Webpack, JS ES6/ES7, Typescript, PostgreSQL, Responsive layout, WebSocket
- Responsibilities: Frontend architecture, i18n, Review code, Development of a distributed digital content management system (documents, audio, video, etc.) The system allows a group of users to work together with a huge amount of media content: upload, download, share, comment and discuss.
- What interesting things I've implemented into the project:
 - added css variables into the project
 - writing custom virtual scroll strategies for elements with dynamically changing height
 - writing complex block reuse directives, styling angular material components, writing complex form components using FormControlValueAccessor.
 - add immutability way to project, thanks to which it turned out to significantly improve the performance of the application by transferring all its components to the OnPush strategy
 - conducted more than 20 javascript/angular interviews and actively participated in hiring and training new employees

Umbrella LLC - October 01, 2015 - May 11, 2018 (2 years 8 months)

-
- Position: Senior Software Developer
 - Technologies: Angular, React, Node.js, Webpack HTML, CSS, PostgreSQL, Responsive layout, Gitlab
 - Responsibilities: Creating Single Page Application sites with the use of JavaScript, Backend development on Node.js
 - Projects: <https://rademacher.at/>, <https://pooltrackr.com/>

Tutmee International LLC - December 13, 2012 - September 08, 2015
(2 years 10 months)

-
- Position: Software Engineer in 2013 / Senior Software Engineer starting in 2015
 - Technologies: Angular, Node.js, Webpack, HTML, CSS,
 - Responsibilities: Creating sites actively using SVG and animation effects. Creation of Landing page and online stores
 - Projects: <https://tutmee.ru/>
